Location: Viçosa, MG, Brazil · Open to remote work

Objective

To work as a **Full-Stack or Back-End Developer**, contributing to the team and growing with the company.

Professional Summary

Full-stack developer with a degree in Systems Analysis and Development. One of the strengths I like to highlight is being **self-taught**: I quickly pick up the technologies and tools each project calls for, and much of what I know comes from studying on my own to solve real problems. I aim to take every deliverable from start to finish while keeping **clear communication** with clients and teammates.

Education

SYSTEMS ANALYSIS AND DEVELOPMENT - Univiçosa - Viçosa, MG, Brazil. 2023 - 2026

Degree, completed. [view diploma \(in Portuguese\)](#)

WEB DEVELOPER PROGRAM - Senac 2022

240-hour professional course. [view certificate \(in Portuguese\)](#)

Experience

FREELANCE DEVELOPER - Self-employed 2023 - present

- Build projects for clients with very different needs, including desktop automation tools, landing pages and web applications.
- Agree on scope and deadlines directly with each client and keep them updated throughout the project.
- Learn on my own the technologies and integrations each project requires, without relying on formal training.
- Manage my own schedule and priorities to handle more than one project at a time.

WEB DEVELOPMENT INTERN - Infocept Solutions - Viçosa, MG, Brazil. Dec 2022 - May 2023

Worked as a full-stack web developer, building and maintaining databases and websites with and without MVC architecture, gathering requirements and working as part of a team using agile practices: Kanban, daily stand-ups and version control. [view internship letter \(in Portuguese\)](#)

Certifications

- English C1 Advanced in reading and listening - EF SET (cert.efset.org/p5P25M)
- Freelance Web Development - Infocept, 180 hours ([view certificate](#))
